

**TRANSLOG 2009 Conference (Transportation and Logistics)  
June 17-18, 2009**

McMaster University, Hamilton, Ontario

***In today's changing economy, it's all about networks; far-reaching business networks, efficient transportation networks and engaging information networks.***

The Annual International Transportation and Logistics (TRANSLOG 2009) Conference is a must for those who seek the latest information on the best ways to move goods, transportation ideas for future business planning and opportunities to learn best practices from peers in the industry and academia. Even more, TRANSLOG 2009 is the only international conference in the greater Hamilton area that is bringing together business leaders, government contacts, leading transportation researchers and valuable information that will benefit your bottom line.

***"TRANSLOG 2009 is a key industry/academia event that will enhance the importance of goods movement as an economic enabler for the global Southern Ontario Gateway. You will want to be part of this leading edge opportunity."***

***John Best, Executive Director, Southern Ontario Gateway Council***
